#### Description:

This pocket-sized Handbook for Lampignano and Kendrick's text has it all: new radiographic images, revised critiques, and more. **Bontrager's Handbook of Radiographic Positioning and Techniques, 9th Edition** provides bulleted instructions, along with photos of properly positioned patients, to help you safely and confidently position for the most-commonly requested radiographic studies. Suggested

techniques and critique points offer a quick reference for evaluating your own radiographs, making it an invaluable tool for learning radiographic positioning in clinical settings.

- **Positioning chapters organized with one projection per page** to present a snapshot of information in an easily accessible and portable format.
- **Unique page layout** - positioning photos and radiographic images are presented on the same page with the text explanation of each procedure - to show you how the patient should be positioned and what the image should look like.
- **Page number references** for the text are included at the bottom of each positioning page so you can easily refer to the text for greater detail and explanation concerning a particular position.
- **217 projections/positions and 4 conversion charts** provide the essential information needed for quick reference.
- **Positioning presentations include positioning instructions**, as well as:
  - Collimation guidelines for each projection.
  - Suggested starting exposure factors, including kVp, mAs, SID (source-image receptor distance), type and speed of film and screens, use of grids, and large or small focal spot.
  - Suggested AEC (automatic exposure control) pick-up cell location when photo-timed equipment can be used.
  - Space for writing in exposure factors (techniques) for specific equipment being used.

This quick review of information before beginning a procedure helps assure you that the exam is being correctly performed with the least possible patient dose.

- Appendices offer additional quick-reference information on patient dose, abbreviations and acronyms, and various conversion charts, enabling you to locate important information quickly.
  - **NEW! Technique chart updates** reflect the latest recommendations for computed and digital radiography.
  - **UPDATED! New positioning photos** reflect the latest equipment and demonstrate proper positioning.
  - **UPDATED! New radiographic images and revised critiques** provide examples using the latest technology, and ensure that you are ready to evaluate your own images.
  - **EXPANDED! New position added on Apical AP axial** give you information and photographs on this position.
-
