**From Library Journal** Michael Milken, Ivan Boesky, Martin Siegel, and Dennis Levine will long be remembered for the Wall Street insider trading scandals of the 1980s. Stewart, a Pulitzer Prize-winning Wall Street Journal reporter who covered the various scandals, has used his reportage as well as an exhaustive culling of court documents, testimony, and interviews with all of the participants to fashion an authoritative account of what happened. Stewart has done a thorough job in assembling the facts and has made connections that may surprise some readers. For example, Milken, the Drexel Burnham Lambert junk bond king who convinced many savings institutions and

insurance companies to buy these bonds in large quantities, may have indirectly contributed not only to the bailout of various thrifts but also to the insolvency of some insurance companies. While this is a well-researched and highly readable work, there is such an abundance of financial details that a glossary of terms and related Wall Street jargon would have been helpful. This minor caveat aside, Stewart's contemporary morality tale is recommended for all business collections in public, special, and academic libraries. (Index not seen.) Previewed in Prepub Alert, LJ 5/15/91.
